

prince de neufchatel

our private yacht...yours

exterior

plenty of room for lounging & sunbathing

interior

1 living room, 1 dinning room with fully equipped kitchen

interior

3 cabins with marble bathrooms

details

The story behind Prince

Built in New York by Adam and Noah Brown in a typical body plan of the American privateers, she was one of the fastest ships of the United States army in the war of 1812.

In 1814, she was chased 17 times by British men – of – war and she outran them every time. After a triumphant victory against the British navy, she went back to Boston and when she sailed again in December of 1814, fully crewed with 120 men under Nicolas Millin, she was chased through a severe gale by three British frigates. The Neufchatel lost spars in the chase and so was taken.

Sir George Collier was so impressed with her sailing speed (13 knots), he sent her to England where she was measured for copying.
